Jet Set-4™ Tooth Shade Acrylic Resin

Product Identification
Very fast curing provisional crown and bridge acrylic resin

Package Contents
REF 3810  Net Wt. 45g
REF 3820  Net Wt. 100g
REF 38H0  Net Wt. 250g
REF 3830  Net Wt. 454g
REF 3850  Net Wt. 2.3kg
REF 3870  Net Wt. 11.3kg
REF 3802X6  Net Vol. 6x30mL
REF 3803  Net Vol. 118mL
REF 3804  Net Vol. 236mL
REF 3807  Net Vol. 3.8L
REF 3808  Net Vol. 19L
REF 3893  Net Wt. 6x45g; Net Vol. 118 mL; glass dropper

Intended Purpose
Fabrication of provisional crowns and bridges; intended to remain in the mouth for less than 30 days.

Contraindications
Jet Set-4 is contraindicated for persons with allergies to methyl methacrylate.

Storage
Keep original container tightly closed in upright position. Store in a well-ventilated place. Keep cool.

Operating / Handling Instructions
Wear protective gloves/protective clothing/eye protection/face protection.

**First Aid**
If inhaled: Remove person to fresh air and keep comfortable for breathing. Call a Poison Center or doctor if you feel unwell. If on skin: Wash with plenty of water and soap. If skin irritation or rash occurs: Get medical advice. Take off contaminated clothing and wash it before use. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get immediate medical advice. If swallowed: Rinse mouth. Do NOT induce vomiting. Get immediate medical advice.

**Other Materials / Equipment Needed**
1. Silicone lubricant
2. Acrylic bur or stone
3. Aquapres® (pressure curing unit), optional
4. Jet™ Adjusters (acrylic stains), optional
5. Jet™ Seal (acrylic sealant), optional

**Instructions for Use**
Note:
- For consistent results always shake Jet Set-4 liquid before use, as catalyst may have separated from monomer.

- **Jet Set-4 acrylic cures quickly, considerably faster than conventional self cure acrylics. Be prepared for short working time.**

1. Coat the prepared tooth and surrounding tissue with a silicone lubricant to allow easy removal of acrylic from prep and to protect the tooth and surrounding tissue.
2. Fill the impression of the tooth that was extracted or prepared with Jet Set-4 acrylic as follows. Moisten surface with Jet Set-4 liquid. Spray on Jet Set-4 powder from dispenser bottle. Alternate liquid and powder until impression is filled. For best results, begin and end with liquid.

3. Seat impression in mouth and hold in place for 1 ½ minutes. Remove and trim excess acrylic. Do not over trim.

4. Reseat impression in mouth and place in and out of patient’s mouth until material reaches a rubbery state and cannot be distorted. CAUTION! Do not allow material to get hot in mouth!

5. Remove impression from patient’s mouth. Allow an additional 4 minutes for curing and cooling, either on bench, or for better results, in Aquapres at 30 psi.

6. Remove provisional from impression and check for fit.

7. Trim excess material with an acrylic bur or stone. Grind to a smooth finish.

9. Clean patient’s teeth of any residual silicone lubricant. Place provisional into mouth and secure with suitable temporary cement.

Disposal
Dispose of unused material in accordance with local, state and national legislation.

Warranty
Manufacturer warrants this product to be free from manufacturing defects for one year from the date of purchase. Warranty is void if product is not used for intended purpose, not used as instructed or not stored in original container.
