Tempo® Acrylic Resin

Product Identification
Cushion treatment denture reline acrylic resin

Package Contents
REF 1020 Net Wt. 100g
REF 1030 Net Wt. 454g
REF 1050 Net Wt. 2.7kg
REF 1070 Net Wt. 11.3kg
REF 1080 Net Wt. 45.4kg
REF 1003 Net Vol. 118mL
REF 1004 Net Vol. 236mL
REF 1006 Net Vol. 946mL
REF 1007 Net Vol. 3.8L
REF 1008 Net Vol. 19L
REF 1009L Net Vol. 200L
REF 1023 Net Wt. 100g; Net Vol. 118mL; mixing cups
REF 1034 Net Wt. 454g; Net Vol. 236mL; mixing cups
REF 1056 Net Wt. 2.7kg; Net Vol. 946mL

Intended Purpose
Fabrication of denture relines

Contraindications
Tempo is contraindicated for persons with allergies to denatured ethanol.

Storage
Close container tightly after use. Store upright in original container, in a cool, dry, well-ventilated location, away from sources of ignition and light.

Operating / Handling Instructions
DANGER: Contains ethyl alcohol. Highly flammable liquid and vapor. In case of fire, use CO₂ for extinction. May cause an allergic skin reaction. Causes serious eye irritation. Wash hands thoroughly after handling.

First Aid: If skin irritation or rash occurs, get medical advice/attention.
See Safety Data Sheet for complete safety information. SDS is available at www.langdental.com or by contacting manufacturer.

Other Materials / Equipment Needed
1. Spatula
2. Knife

Instructions for Use
For consistent results, always shake Tempo liquid before use.

A. Soft Denture Liner
1. Clean and disinfect denture base. Grind down areas that require relief.
2. Mix approximately 2 parts Tempo powder with 1 part Tempo liquid, stirring thoroughly for 10 seconds.
3. Allow mixture to gel until it becomes viscous, yet flowable. Pour into denture areas requiring treatment.
4. Have patient rinse mouth with water. Insert denture into patient’s mouth. Have patient come to a bite rest position to align occlusion and hold this position for three minutes. Patient can then talk, read aloud or chew gently to generate a functional impression. Total curing time is 20 minutes from initial mixing.
5. Remove relined denture from patient’s mouth. Check to see if peripheral border is adequately covered and sufficient material has been used to give treatment area full coverage. Additional Tempo can be added at any time. Trim excess material with a sharp knife.
6. Have patient return periodically to note progress of treatment. To fix sore spots occurring as a result of denture base showing through reline, grind down reline and add another coat of Tempo.

NOTE: Tempo can be removed from a denture base by scraping with a knife. The thin surface layer can then be dissolved with methyl methacrylate based acrylic monomer.
B. Functional Impression Material
To use Tempo as a functional impression material only, follow steps 1-5. Allow patient to wear denture with Tempo for 5 to 24 hours. Pour up stone model as soon as possible after removal of impression from the patient’s mouth.

Disposal
Dispose of unused material in accordance with local, state, and national legislation.

Warranty
Manufacturer warrants this product to be free from manufacturing defects for one year from date of purchase. Warranty is void if product is not used for intended purpose, not used as instructed or not stored in original container.
