With over 80 years of industry knowledge, Lang Dental™ manufactures the highest quality products that are widely acclaimed for their strength, durability and ease of use. When you need a solution for your patient, we recommend using our complete Jet Acrylic product line. From powder to final form, all our products are formulated to guarantee success the first time, every time.
**Jet XR**

Self-Curing, Radiopaque Acrylic

Jet XR Radiopaque Acrylic Resin is intended for the fabrication of methacrylate-based acrylic appliances and used wherever a radiopaque acrylic dental device is useful in establishing an anatomical location or site, such as a provisional implant stent.

**Pre-Mixed Compound**
Improves efficiency of lab technician requiring no additional handling and assures uniform and consistent mixing of all components for optimum diagnostic imaging.

**2 Levels Of Opacity—Shadow And Opaque**
Provides the clinician with an option of differing opacities when differentiation is important.

**Methyl Methacrylate System**
Easy to trim and adjust.

---

**Jet Set-4**

Fast-Setting, Provisional Acrylic

Our goal—Introduce a cost-effective solution for dental professionals that provides greater chairtime efficiency with the quality that you expect from all of our Jet Brand Acrylics.

Jet Set-4 Brand provides all of the physical property advantages of a methyl methacrylate and sets faster,... with up to 2 minutes of work time and final set in only 4 minutes!

- **Self-curing**
  Remains color stable for long-term aesthetic integrity

- **2 Min. Work Time / 4 Min. Set Time**
  Improves chair-time efficiency

- **Superior Tensile & Flexural Strength**
  Provides a durable temporary for greater patient satisfaction and comfort

- **No Significant Oxygen Inhibited Layer**
  Minimizes repair time without additional surface preparations

- **Methyl Methacrylate System**
  Allows easy trimming and adjustments

- **Wide range of color options**
  Matches the patient’s shade perfectly for greater acceptance

**For a complete Provisional Crown & Bridge system, we also recommend:**

**Jet Adjusters**

This liquid resin system allows you to customize your newly created temporary crown or bridge for a more natural appearance when matching the patient’s dentition. We offer eight long-lasting, translucent and stable colors that bond directly to the fabricated tooth. Cures quickly (less than 2 minutes) and can be used chairside or in a lab prior to final cementation. Also eliminates porosity.

**Aquapres™**

For the best results, from start to finish, use the complete line of Lang Dental products. Our Aquapres ensures dense, porous-free, color stable finished appliances, quality your patients expect and reliability we guarantee.

**Jet Seal**

As the final line of defense, protect the temporary with Lang Dental’s revolutionary self-curing sealant. Decreases porosity, increases color stability and finishes like a pro. Provides an excellent aesthetic without polishing.
